

Abstract of the Disclosure

1 A plastic coupling for joining two metal pipe sections end-to-end to form a pipe assembly.
2 A first plastic spigot cuff is formed along the periphery of the end of the first pipe and a
3 mating second plastic bell cuff is formed along the periphery of the end of the second pipe,
4 such that the first and second cuffs form a bell and spigot joint with the first, spigot cuff
5 inserted into and joined to the second, bell cuff.
